

ASSET OVERVIEW SHEET

The OPS Network™ - **IMS | hub™** platform is a secure and comprehensive **law enforcement only** investigation, event and operational management system, serving as a centralized platform that streamlines and enhances the management of various operational processes - while offering an integrated approach to operational management, incident investigation, event coordination, resource management, and workflow optimization.

With **IMS | hub™**, law enforcement organizations can track and manage small to large scale operations, investigations and events in real-time, enabling efficient coordination internally and between various agencies and teams. Using advanced tools for data collection and coordination, **IMS | hub™** provides insights that are crucial for informed decision-making, ensuring that operational workflows are optimized, leading to legally sound and secure resolutions.

Key features of IMS | hub™ include:

- **Investigation/Event Management:** A robust framework to handle the entire lifecycle of an investigation or event, from initiation to resolution, ensuring that each matter is properly documented and followed through.
- **Operational Oversight:** Provides real-time tracking of operational activities, allowing teams to monitor key components and ensure compliance with operational protocols.
- **Collaborative Workflow:** Streamlines internal and cross-departmental collaboration with shared access to data, task tracking, asset management, and more ensuring transparency and consistent communication throughout the operational process.
- **Tracking and Reporting:** Equipped with powerful task management features, **IMS | hub™** helps stakeholders make informed decisions that improve efficiency and mitigate risks – from investigation, operational and task related geo-mapping, to document and media management.
- **Complete Solution:** With easy-to-use export and court discovery related features, **IMS | hub™** provides the processes to take data and turn it into court compliant evidence while ensuring all collected data is secure and maintained for integration into agency records management and evidence systems.

By centralizing and streamlining investigative and event management through effective operational oversight, **IMS | hub™** maximizes efficiency, reduces operational bottlenecks, and ensures a legally sound and more proactive approach to modern policing.

Integrated solution of the OPS Network™ and OPS CONNECT™ mobile application.
